Applications

The Magnum FP Packer system enables high-pressure cycling without leakage in a wide range of applications and casing sizes. The Magnum FP Packer system together with the FP seal system allows for a one trip completion system.

Features and Benefits

- External Retrieving Neck allows retrieval thru obstructions.
- One piece Packer and Top Coupling reduces leak paths while retaining greater bore alignment
- Two piece release mechanism designed for straight pull release no jarring required.
- Large bore thru packer and seals
- Three piece high pressure Echner Array sealing element.
- Splined not keyed for ease of milling if required.
- Case hardened Bi-directional slips.
- Lower Gage Ring to prevent premature setting.

Packer Specifications

Casing Size (in)	Casing Weight lb/ft (kg/m)	Packer OD (in)	Packer ID (in)	Seals ID Std. (in)
7	20-26 (29.7- 38.7)	6.076	3.25, 4.00	2.375, 2.985
	26-32 (38.7- 47.6)	5.891	3.25, 4.00	
	32-38 (47.6 - 56.5)	5.737	3.25, 4.00	
	41 (61)	5.64	3.25	2.375
	49.5 (73.7)	5.516	2.688	1.925
